Efe Morina

Frontend Developer
Prizren, Prizren District, Kosovo

Summary

I'm Efe Morina, an experienced Frontend Developer with a passion for building intuitive and scalable web applications. I specialize in core web technologies such as HTML, CSS, and JavaScript, and I'm skilled in using modern JavaScript frameworks like React and Vue.js to create dynamic user interfaces. I also leverage CSS frameworks like Tailwind CSS and Bootstrap to develop responsive, mobile-friendly designs.

Throughout my development process, I work with Adobe Photoshop for visual design and ensure efficient version control using Git and GitHub. With a strong focus on UX/UI design, I strive to deliver high-quality, sustainable, and performance-driven solutions on every project.

I also have experience with backend technologies like Node.js, which allows me to manage both frontend and backend integration seamlessly. I am committed to web standards, accessibility, and SEO best practices, ensuring that each project is optimized for the best possible user experience.

Always open to new technologies and solutions, I aim to collaborate effectively with teams while maintaining a high standard of quality and continuously evolving with the tech landscape.
